

10.0 NEXT STEPS:
IMPLEMENTING THE VISION

10.0 Next Steps: Implementing the Vision

The vision for the reuse and redevelopment of Fort Monmouth calls for the creation of a Sustainable Technology Community composed of activity zones designed to energize the site and blend with the fabric of the host communities, while also respecting existing neighborhood character. This Plan has been developed in cooperation with the host municipalities and Monmouth County, who have identified local objectives, and is documented in the preceding chapters of this Plan through diagrams, plans, illustrations, text, and tabular data.

This chapter identifies the necessary steps for realizing the Fort's transformation into a built Sustainable Technology Community. The planning process for reaching the desired results for the Reuse Areas does not end with the completion of this Plan. Additional review and analysis would need to occur prior to the formal adoption of a preferred Final Reuse Plan. The following steps are necessary to finalize the Plan and begin the process of implementation.

10.1 Implementation

1. RESOLVE COAH OBLIGATIONS

The revised Third Round COAH rules, outlining municipal affordable housing obligations, were up for adoption in June 2008. FMERPA commented on the proposed rule, asking whether the affordable housing obligation related to Fort Monmouth could be met by the host municipalities on a regional rather than individual basis. FMERPA and the Boroughs are involved in ongoing discussions to clarify the COAH obligation for the redevelopment of Fort Monmouth and the three municipalities.

2. FINALIZE COMMUNITY IMPACT ANALYSIS

The multi-disciplinary planning team and FMERPA have held extensive discussions with the communities regarding the assessment. Fully analyzing, developing, understanding, and building consensus on the potential impacts of the area's reuse and redevelopment are critical to the Plan's adoption by FMERPA with support of the local municipalities. Coordination between FMERPA, the planning team, and the community will continue beyond the release of this Final Plan.

3. EXPLORE POTENTIAL BENEFITS OF A REVENUE SHARING MODEL OR INTER-LOCAL AGREEMENTS

A model for Revenue and Cost Sharing that provides a win-win-win scenario for the three Boroughs can only be developed with a full understanding of the community impacts of redevelopment and reuse. During this ongoing phase of work, a range of sharing structures should be explored. These could include formation of an oversight entity, or the establishment of a series of inter-local agreements between the Boroughs to provide the required services in an efficient manner.

4. CONCEPT PLAN ADOPTED

This Reuse Plan is intended to serve as a guiding document to FMERPA and other regulatory authorities as the Reuse Plan is evaluated. FMERPA adopted the Reuse Concept Plan on September 03, 2008, understanding that the Final Reuse Plan would continue to evolve. The adoption of the Reuse Concept Plan sends an important message to community members and state and local officials that FMERPA supports the Reuse Plan and planning essentials set forth in the Plan.

5. PROMOTE THE REUSE PLAN

FMERPA should continue to review the Plan with the host municipalities and other public and private stakeholders. This would enable FMERPA to maintain a level of public involvement and continually receive, and incorporate into the planning process, valuable public input, a crucial process for building consensus and setting the stage for successful implementation. To communicate the vision for the Reuse Areas, a variety of media should be engaged including brochures, websites, and print and televised media. These vehicles would allow FMERPA to promote the Plan, and make it a tool for transformation of Fort Monmouth that “learns” how to evolve in response to changing economic and other circumstances. To aid this process, the State, municipalities, and FMERPA should develop a communications strategy and allocate funds to ensure the sustained promotion of the Plan.

6. COLLABORATE

The strength and viability of the Plan would rely on multi-level partnerships. These should include partnerships between the State of New Jersey, Monmouth County, and the host and adjacent Boroughs, the Department of the Army, the Department of Housing and Urban Development (HUD), local advocates, and the redevelopment community.

The Reuse Plan is just one component of the larger BRAC process. Additional review of the Plan is necessary and the Final Reuse Plan should incorporate the requirements of NJDEP regarding cleanup, the implications of newly-adopted COAH requirements, compliance with the NJ SHPO requirements, and the HUD Homeless Screening Process.

7. ADOPT ZONING AND A FORM-BASED CODE

The Fort Monmouth Implementation Local Redevelopment Authority (LRA) should adopt a Form-Based Code to guide the redevelopment process. The Code should be referred to the three Boroughs as required by N.J.S.A. 52-271-14.

A Form-Based Code would allow as-of-right development of the property in conformance with standards designed to achieve the stated vision of the Reuse Area, and eliminate the guessing game often associated with conventional zoning. Recognizing that the Reuse Area would continue to contain valuable historic resources, the Form-Based Code would include mechanisms for the proper maintenance of historic structures and a strict review process for new development. Appropriate regulations that are supportive of community-endorsed policies can encourage reuse and redevelopment by providing transparency, clarity, and certainty. By establishing clear standards that support the Boroughs’ vision, a Form-Based Code would provide a visual guide to design character, helping FMERPA and the communities assure that reuse and redevelopment would occur in a desirable fashion

8. ESTABLISH THE OFFICE OF THE POST ARCHITECT

FMERPA’s Implementation LRA should establish the Office of the Post’s Architect and establish the position of Post Architect. This professional should have a full understanding of the principles that underpin the Reuse Plan, as well as a comprehensive understanding of the historical significance and heritage of Fort Monmouth. The Post Architect should oversee the application of the Fort’s zoning and form-based code. The Post Architect in concert with the LRA and local authorities would review development and building plans for compliance with regulating ordinances and provide design guidance as the Plan evolves over time.

9. EVALUATE STAFFING NEEDS OF THE IMPLEMENTATION LRA

At the conclusion of the Planning LRA’s duties, an Implementation LRA should be formed to oversee the reuse and redevelopment of the Post. Consideration of the specialized staffing needs should be undertaken in the near future. A staffing Plan should be developed to address Post promotion and marketing, day to day

operations, implementation of the reuse Plan, economic development policies and incentives, environmental protection, historic preservation, maintenance of facilities and infrastructure, legal counsel, ongoing public communications, and administrative support.

10. MAINTAIN INFRASTRUCTURE

Resources need to be made available to insure that infrastructure repairs are met by Federal Authorities while they still control the property. Some infrastructure demands would be met by market forces and user fees, while other services would require ongoing support of the LRA, Boroughs, or County such as police and fire protection, maintenance of streets, roads, bridges and parks. Returning infrastructure in working condition to the appropriate authority is critical to early success of the Plan. Additional investigation of how the utility infrastructure would be operated is warranted as it could provide revenue to the LRA in support of future reuse.

11. BEGIN ENVIRONMENTAL CLEAN-UP

Fort Monmouth clean-up before reversion is critical. The Implementation LRA should analyze the options for clean-up and remediation of contaminated areas of the Post. Discussion with the federal government to further understand clean-up funding availability and timetables should be undertaken. Alternative approaches to federal clean-up including privatization of the clean-up process warrant exploration.

12. PURSUE FUNDING MECHANISMS

To achieve the goals for reuse of Fort Monmouth, discussions should be entered into with Federal, State, County, and Borough representatives to further explore a variety of funding mechanisms. Key funding sources used at other base closings include:

- Bonds and private debt
- Federal, State, County and Local Government Appropriations
- Federal and State grants
- Local Redevelopment Authority revenues.

Additional funding sources for reuse and redevelopment include private foundation grants, private investment capital, tax credits, impact fees, business improvement districts, and special assessment districts. The format of real estate transactions would also have an impact on the degree to which funding would be needed from public sources. Short- and long-term leases and rental opportunities, as well as the sale of structures and property can assist with lessening the financial impact of the maintenance and upkeep of the property.

13. ATTAIN SHPO APPROVAL OF HISTORIC DISTRICT(S)

The LRA should hire a Historic Preservation Consultant to prepare the necessary studies and reports for SHPO in support of the creation of historic districts at the Post. These analyses should also prepare a plan for the long-term maintenance and protection of the Post’s valuable heritage resources.

14. PRO-ACTIVELY MARKET FORT MONMOUTH

Additional plans and strategies would be required in the years ahead to properly market and position Fort Monmouth. The Implementation LRA should further detail and implement a marketing strategy to attract businesses, residents, institutions, and visitors to Fort Monmouth. This strategy should focus on the branding and identity of Fort Monmouth as a Sustainable Technology Community, where heritage tourism, protected open spaces and economic vitality are combined for a desirable quality of life and beneficial future as these areas formerly behind the fence become reintegrated into the fabric of the boroughs.

10.2 Impact Statement

The County of Monmouth and the communities contiguous to Fort Monmouth have long enjoyed a communal relationship with both the employees and the military personnel at the Fort. This social and economic interaction has been an essential fiber in the fabric of this Central New Jersey region. The strength of this fabric has been

severely diminished as a result of the 2005 BRAC decision to close Fort Monmouth. The impact of this decision cuts across a myriad of social and economic issues, many of which are being addressed through the creation of the Fort Monmouth Reuse and Redevelopment Plan and the associated economic, social, and infrastructure studies that support the Plan. In order for this region to continue to prosper following the Fort closure as dictated by the BRAC decision, careful and measured execution of a robust economic revitalization strategy is mandatory. This should be carried out in concert with addressing the obvious needs for affordable housing and the homeless continuum. The uncertainty that these elements bring to the residents of the three host communities of Tinton Falls, Eatontown, and Oceanport, which are already reeling from the economic downturn and one of the most severe tax burdens in the country, is further aggravated by the enormity of the prospective infrastructure costs that their towns face.

While the Plan itself, as a land use concept, enjoys the support of a majority of the area’s people, much of the skepticism of its execution is centered around the cost and the time to execute the Plan. Necessary improvements to essential components such as electrical service, potable water, sewerage treatment, sludge removal and treatment, local and regional traffic mitigation, and public transportation availability will require extensive funding, very little if any of which will be available from an already deficit ridden State. Without the necessary funding from private or federal sources to address these essential components, the Plan, regardless of its enormous upside potential, may fail. And failure is not an option.

Therefore, we look forward to addressing this Plan, its potential contributions to the revitalization of the region, and its attendant needs, with our colleagues at the Department of the Army.
